

# University of the West of England: Guidelines for General Module Funding Applications 2026/27

## CONDITIONS

- Funding offer is equivalent of up to 1 x (Level 6 or Level 7) 20 credit module **within** the 2026/27 Academic Year (available cohorts only).
- If you find a short course at a lower level, this is also acceptable.
- It is not possible to secure funding for a full degree programme.
- It is **not** possible to select a UWE module in which there has been an alternative application route, even where that application deadline has passed. This includes the following modules: Leadership & Innovation; Minor Illness & Minor Injury in Children; Pathophysiology & Diagnostic Reasoning for Advanced Practice; Physical Assessment & Clinical Reasoning of the Presenting Child; Dissertation; Supporting & Managing those at risk of suicide; Pre-Hospital Trauma Care; Remote Clinical Decision Making). Any applications for these modules would be rejected.
- It is not possible to choose any modules relating to independent prescribing. *Please contact us separately about this if you feel you meet criteria for IP.*
- Only one application per person (only one module across all universities per successful applicant is offered as standard).
- It is not possible to offer places on modules which require placement or a SWASFT supervisor or mentor. It is the **responsibility of the student to check this & CPD are unable to support with any such requests.**
- **It is the responsibility of the applicant to check that they meet the entry requirements** of selected modules prior to completing an application for funding. \*
- All funding needs to be approved by SWAST CPD before any applications are made with UWE: **any early attempts to enrol with UWE will unfortunately be rejected.**
- **Capacity on all modules is managed by UWE**, therefore at the point of application there are no ring-fenced places. After closing date, and following review of applications, UWE will be approached to ascertain capacity. Only then will places be ring-fenced for purchase.
- **You are only guaranteed a place a point of successful enrolment with UWE.** Applicants who are successful with their funding application are therefore advised to enrol on their chosen module promptly – therefore we suggest having a fairly firm idea of which modules you may like to do at this stage.
- It is the responsibility of the student to ensure that they are available for all module contact dates & are able to commit to the study.
- It will not be possible to process any individual applications post application deadline.
