

University of Plymouth: Guidelines for General Module Funding Applications 2024/25

CONDITIONS:

Funding offer is equivalent of up to 1 x Level 6 or Level 7 20 or 40 credit module within the 2024/25 academic year (available runs only).

- If you find a short course at a lower level, this is also acceptable.
- It is not possible to secure funding for a full degree programme.
- Only one place per person.
- It is not possible to choose any modules relating to independent prescribing. *Please contact us separately if you wish to complete one of these modules and you already have prescribing status & use this as part of your SWASFT role.* *
- If you are selecting a module which stipulates that you require placement or a SWASFT supervisor or mentor, **it is the responsibility of the student to arrange this.** Please carefully consider if you feel this will be possible as CPD are unable to support with this. *
- It is the **responsibility of the applicant to check that they meet the entry requirements** of selected modules prior to completing an application for funding. *
- All funding needs to be approved by SWAST CPD before any applications are made with UoP: **any early attempts to enrol with UoP will unfortunately be rejected.**

Capacity on all modules is managed by UoP, therefore you are only guaranteed a place a point of successful enrolment with UoP. Applicants who are successful with their funding application are therefore advised to enrol on their chosen module promptly - therefore we suggest having a pretty firm idea of which modules you may like to do at this stage.

SUGGESTED MODULES:

Previously Popular Modules:	Module Code	Further info:
Advanced Assessment for Clinical Practice - <i>Complete APP701 1st</i>	APP710	Link to UoP Module Page. <i>*Placement may be required*</i>
